

Safe & Secure Program

Goal: the prevention of burglaries and thefts in residential areas and small businesses, the recovery of stolen property and the apprehension of burglary and theft suspects in Lake Charles.

Accomplished by: targeting areas with the highest burglary rates, making contact with the citizens in those areas, providing those citizens with information and tools for preventing a burglary at their home.

Information through: Neighborhood Watch meeting or other similar groups.

Included in the program:

1. A home security survey (form can be provided or a detective can be scheduled to come to your residence.)
2. A home inventory list forms and instructions.
3. Instruction on how to “mark” property.
4. Information, including a checklist, for reporting suspicious persons and crimes in progress in their neighborhood.

Using these techniques along with the Leads Online program will quickly identify stolen property and the suspects selling the stolen property and will lead to the recovery of victim’s property and the apprehension of burglary and theft suspects.
